TABLE OF CONTENTS

Table No	•	Page No.
	Highlights	3
1.	Federal order minimum Class and blend prices for milk of 3.5 percent butterfat content, f.o.b. market or other indicated point, and butterfat differentials, May	4
2.	Federal order minimum Class I and blend prices for milk of 3.5 percent butterfat content, f.o.b. market or other indicated point, January-May averages	6
3.	Number of producers delivering milk to handlers regulated under Federal orders, total deliveries, and average daily deliveries per producer, May	8
4.	Producer milk deliveries used in Class I and gross Class I sales by handlers regulated under Federal orders, May	10
5.	Producer milk deliveries to handlers regulated under Federal orders and deliveries used in Class I January-May	12
6.	Total fluid items, whole milk, skim milk items, milk and cream mixtures, and cream sold in marketing areas defined by Federal milk orders, for markets where such information is available, April, with comparisons	14
7.	Federal milk order Class I formula price information, May	18
8.	Prices and economic indexes used in Federal milk order formulas to determine May prices, with comparisons	20
9.	Federal order base and excess prices for milk of 3.5 percent butterfat content, May	21
9a.	Seasonal incentive fund excluded under various Federal milk orders, May	21
	Major order actions, May	22

Highlights

MAY 1967

<u>Producer Deliveries</u>. A total of 124,639 producers delivered 4.5 billion pounds of milk to regulated handlers in 66 comparable markets during May 1967. This is 0.5 percent above producer deliveries in May 1966. Average daily delivery per producer increased from 1,098 pounds in May 1966 to 1,156 pounds in May of this year. Producer numbers, producer deliveries, average butterfat percentages, and average daily deliveries per producer for individual markets are shown on table 3.

Producer Deliveries Used in Class I. The volume of producer deliveries used in Class I in 66 markets decreased 0.8 percent from last year, to a total of 2.6 billion pounds for the month of May 1967. The smaller decrease for May than for earlier months may be the result of four Sundays occurring in May this year, as compared to the five last year. Very little milk is sold by handlers on Sunday. The average utilization percentage for May was 58 percent, down from 59 percent last year. Twenty-five markets showed an increase in the utilization percentage, 7 showed no change, and the remaining thirty-four markets showed a decrease (See table 4).

Gross Class I sales, which comprise total Class I sales by regulated handlers, in-and-out of defined marketing areas, decreased 1.0 percent in the 66 markets for the month of May.

Minimum Prices. The weighted average Class I price paid by handlers in the 66 markets for 3.5 percent milk was \$5.95 per hundredweight, 66 cents higher than the \$5.29 per hundredweight price in May 1966. Minimum Class I prices for May were higher in all 66 markets.

Producers in the 66 markets received a weighted average blend price of \$4.92 per hundredweight for 3.5 percent milk. This is 41 cents higher than the May 1966 blend price of \$4.51. Producer received higher blend prices in 65 of the 66 markets. Class prices, blend prices, and associated butterfat differentials, by markets are reported on table 1.

Fluid Milk Sales. Total in-area fluid milk sales for May 1967 in 67 marketing areas are estimated to be about 2.1 billion pounds, 2.3 percent above such sales in May of last year. Complete April in-area sales for total fluid items, and for the four major fluid product groupings (whole milk, skim milk items, mixtures, and cream), are reported on table 6.

YEAR TO DATE

Minimum Prices. The weighted average Class I price for the January-May period for the 66 markets was \$5.89, 53 cents higher than the \$5.36 price in 1966. The 1967 weighted average blend price was \$5.11, 42 cents higher than the blend price of \$4.69 reported for this period in 1966 (See table 2).

<u>Producer Deliveries and Deliveries Used in Class I.</u> Milk deliveries and deliveries used in Class I are reported for individual markets on table 5. In the first five months of this year, compared to the same period in 1966, producer deliveries for the 66 markets were up 0.8 percent, and deliveries used in Class I were down 2.5 percent. Data for the 66 markets and for all markets are summarized below:

Producer Milk Deliveries	and Deliveries Used	in Class I,	January-May

In markets with seasonal Class I differentials, the action establishes fixed differentials equal to the annual average of such seasonal differentials. For the purpose of computing Class I prices in the above markets, the amendment provides that the basic formula price (Minnesota Wisconsin price) shall not be less than \$4.05 for the period May 1, 1967 through April 1968. For the same period, the amendment increases the Class I differentials in each of the above markets by 20 cents per hundredweight. The following 11 markets are similarly affected since their prices are based upon markets listed above: Austin-Waco, Central West Texas, Corpus Christi, Lubbock-Plainview, San Antonio, Ozarks, Paducah, Southern Illinois, Western Colorado, Youngstown-Warren, and Red River Valley.

Connecticut and Massachusetts-Rhode Island - May 1 (32 FR 6608 and 6607, 4/29/67). For the period May 1, 1967 through April 1968, amendment provides for the Connecticut Class I price each month to be \$6.62 plus 20 cents and for the Massachusetts-Rhode Island Class I price to be \$6.15 plus twenty cents.

Delaware Valley, Washington, D. C., and Upper Chesapeake Bay - May 1 (32 FR 6608, 4/25/67).

Seasonality in the Class I price under the Delaware Valley order is eliminated by revising the quarterly Class I price schedule in Section 1004.50 (a) (2) of the order to a yearly schedule of prices. For the period May 1, 1967 through April 1968, the amendment adds 20 cents to the prices contained in the revised Class I price schedule. The Class I price for the Washington, D. C. and Upper Chesapeake Bay orders shall be the Delaware Valley Class I price minus 10 cents.

<u>Eastern Colorado</u> - May 1 (32 FR 6389, 4/25/67). Route definition amended to provide that packaged fluid milk products transferred to a distributing pool plant from a plant with route disposition in the marketing area, and classified as Class I milk, be considered as a route disposition from the transferor plant rather than from the transferee for the single purpose of qualifying such plant as a distributing pool plant.

Northern Louisiana - May 1 (32 FR 6763, 5/3/67). Amendment provides for fluid milk products in ending inventory to be classified as Class I milk. Transfer provision revised to provide for skim milk and butterfat in fluid milk products transferred from a pool plant to a nonpool plant and then to a pool plant to be considered a direct transfer between pool plants. Amendment also provides for a milk plant operated by a governmental agency to be exempt from all provisions of the order.

The Class II price is the Minnesota-Wisconsin price not to exceed the butter-powder formula price minus 48 cents. Previously, the Class II price was based on a butter-powder formula with a deduction of 5 cents for the months of March through June.

MAJOR ORDER ACTIONS, MAY 1967 -Continued

Amendments: -Continued

- Northwestern Ohio May 1 (32 FR 6609, 4/29/67). For the period May 1, 1967 through March 1968, the amendment provides for a fixed differential of \$1.45 (instead of seasonal differentials) to be added to the basic formula price each month to compute the Class I price. For the same period, the amendment provides for the basic formula price (Minnesota-Wisconsin price) to be not less than \$4.05.
- Ozarks May 1 (32 FR 6611, 4/29/67). Amendment provides for the Class I price to be the Class I price announced for the 0 to 30 mile zone each month under the St. Louis order minus 25 cents. Previously, the Ozarks Class I price was the St. Louis Class I price announced for the 30 to 40 mile zone minus 11 cents for the months of July through March, and minus 4 cents for the months of April through June.
- Paducah May 10 (32 FR 7068, 5/10/67). Amendment increases from 20 cents to 50 cents per hundredweight the amount withheld from payments to producers under the seasonal incentive payment plan (Louisville Plan) during the months of April through July.
- Upstate Michigan May 1 (32 FR 6610, 4/29/67). Amendment establishes a fixed Class I differential of \$1.29 (average of the seasonal differentials previously used in the order) to be added to the basic formula price each month to compute the Class I price. For the period May 1, 1967 through April 1, 1968, the amendment provides for the basic formula price (Minnesota-Wisconsin price) to be not less than \$4.05. For the same period, the amendment increases the Class I differential by 20 cents per hundredweight. Action provides that the Class I price be based on the basic formula price (Minnesota-Wisconsin price) for the previous month instead of the current month. Action also provides for the Class I price and the handler butterfat differential to be announced for the current month instead of for the preceding month. Announcement date for prices will continue to be the 5th day of each month.

Suspensions:

- North Texas and Oklahoma Metropolitan May 1 (32 FR 6614, 4/29/67). Action suspends the effect of the supply-demand adjustors to the Class I prices in these orders for the month of May 1967. The following 6 markets are similarly affected since their prices are based upon the above markets:

 Red River Valley, Austin-Waco, Corpus Christi, Central West Texas, Lubbock-Plainview, and San Antonio.
- Puget Sound May 24 (32 FR 7583, 5/24/67). Action suspends for an indefinite period the transfer provision which provides that milk transferred or diverted to a nonpool plant located outside the marketing area or outside of a designated five-county area be classified as Class I. The suspension will permit Class II classification of milk transferred to a nonpool plant (under certain conditions) regardless of its location.
- Quad Cities-Dubuque May 1 (32 FR 7843, 5/30/67). For the period of May through August 1967 this suspension order will make it possible for route sales which are delivered to other plants to be included in the Class I route sales which are required to qualify a distributing plant for pool status.
- St. Louis May 6 (32 FR 6967, 5/6/67). Action suspends for the month of April 1967 the limitation that not more than 16 days' production from a producer may be diverted from a pool plant to an other order pool plant.
- Tampa Bay May 1 (32 FR 6835, 5/4/67). Action suspends for the months of May and June 1967, the provisions that limit the quantity of producer milk that may be diverted to nonpool plants by cooperatives and proprietary handlers.
- Western Colorado May 4 (32 FR 6835, 5/4/67). Action suspends for the period May through September 1967, the diversion provisions for cooperative associations under which member milk must be received at distributing pool plants for at least 5 days during the month as a condition for diverting it.
